PROFESSIONAL SUMMARY

With a solid foundation in **Programming Languages, Software Development**, and **Analytical Thinking**, I am enthusiastic about *Python* and its real – world applications. I am proficient in *Python* and modern *Web Technologies*, and I possess the ability to quickly grasp new tools and frameworks. Known for my effective *communication, teamwork*, and *time management* skills, I am enthusiastic about contributing to innovation software and data driven solutions, while continually learning and growing as a technology professional.

EDUCATION

- **MCA:** Computer Applications, 2023 – 2025
East West Institute of Technology, Bengaluru, INDIA
- **BSc:** Bachelor of Science, 2020 – 2023
Government Science College, Hassan, INDIA

COURSES

- **Data Science:** SVL Technology, 02/2025 – 02/2026
- **Python:** Great Learning Academy, 01/2024 – 02/2024
- **Social Networking:** VTU, 02/2024 – 05/2024

EXPERIENCE

- **Intern – Python Web Development** | *SVL Technology*, 11/2024 – 01/2025
Worked on a Blood Bank Management System using **Python (Flask / Django), SQL, HTML, CSS** and **JavaScript**. Implemented donor / recipient registration, blood inventory tracking, and **CRUD** operations to streamline blood donation and request processes.

SKILLS

- **Platform:** VS Code, PyCharm, MS Office suite, Anaconda Navigator, MySQL Workbench 8.0 CE, SQL Server Management, Linux
- **Programming Language:** Python, R, JavaScript, TypeScript, React.js, Node.js, MySQL, HTML, CSS
- **Version Control:** Git & GitHub
- **Development Tools:** Pandas, NumPy, Scikit-learn, TensorFlow, Seaborn, Matplotlib, Flask

PROJECT

- **URL Phishing Detection – Machine Learning:** Built a model to classify URLs as legitimate or malicious using feature – based analysis to prevent phishing attacks.
- **Book Recommender System – Machine Learning:** Developed a recommendation model using collaborative and content – based filtering to suggest books based on user preferences and behaviour.
- **Library Management System – React Website:** built a full – stack application using react, TypeScript, JavaScript, and Node.js for managing books, user authentication, and inventory tracking.
- **Food Analysis – Machine Learning:** built a deep learning model using python and TensorFlow to analyze nutritional values and classify food items with high accuracy.
- **Zomato Clone – React Website:** Developed a food delivery web app using React, TypeScript, JavaScript, and Node.js with restaurant listings, menu browsing, ordering, and responsive UI.
- **Blood Bank Management System:** Developed a full – stack system using python and JavaScript with HTML / CSS for user authentication, blood inventory tracking, and donor / recipient management.
- **Crop Recommendation & Disease Detection – Machine Learning:** Developed a model to recommend crops and detect plants diseases using environmental data and deep learning.
- **Framing – React Website:** Built a full – stack web application using React, TypeScript, Node.js, and JavaScript with a responsive and user – friendly interface.

HACKATHON

- **Best idea award:** National Youth Conference – 2025.
Topic: *Colour Therapy, Akanksha Charitable Trust.*

ACHIEVEMENTS

- **Publication:** *AI – Driven Molecular Design and Screening for Drug Discovery*, published in **International Journal of Scientific Research in Engineering & Management (IJSREM)**, Volume 09, Issue 08, August 2025.

DOI: 10.55041/IJSREM52104, Indexed in major scholarly databases.
